Thin Solid Films 312 (1998) 375–380

thin solid films

Subject Index of Volume 312

Adhesion
Mechanical stability of DLC films on metallic substrates. Part II—Interfacial toughness, debonding and blistering, 219
Adsorption
In situ AFM observation of heterogeneous growth of adsorbed film on cleaved mica surface, 20
Mechanical stress in micromachined components caused by humidity-induced in-plane expansion of thin polymer films, 232
Al bonding layer
Mechanical stability of DLC films on metallic substrates: Part I—Film structure and residual stress levels, 207
Aluminium
Metal-organic chemical vapor deposition of aluminum from dimethylethylamine alane, 259
Aluminium antimonide films
Growth and properties of aluminium antimonide films produced by hot wall epitaxy on single-crystal KCl, 111
Aluminum film
Metal-organic chemical vapor deposition of aluminum from dimethylethylamine alane, 259
Anatase
Composition, binding states, structure, and morphology of the corrosion layer of an oxidized $Ti_{0.46}Al_{0.54}N$ film, 190
Anisotropy
Electric field induced molecular reorientation in stilbazolium salt Langmuir–Blodgett monolayers, 295
Antimony
Structure and crystallization of Sb–Se films prepared by vacuum evaporation method, 93
Artificial passive films
Characterization of r.f.-sputtered iron oxide films for modeling passive films, 46
Atomic
Stress calculations for carbon nanotubes, 11
Atomic force microscopy
Studies on preparation of ultra-thin films of precursor polymer of poly(*p*-phenylenevinylene) via Langmuir-Blodgett technique, 291

Bacteriorhodopsin
Optical and electrical properties of bacteriorhodopsin Langmuir–Blodgett films, 306
Band edges
Electron transport in porous silicon, 254
Berkovich nanoindentaion process
Simulation of Berkovich nanoindentation experiments on thin films using finite element method, 240
Boron–carbon thin films
Structure of plasma-deposited amorphous hydrogenated boron–carbon thin films, 147
Boron diffusion
Effect of boron diffusion doping of silicon on the micromechanical and luminescent properties of porous layers, 202

Cadmium sulphide
On the deposition of Langmuir–Blodgett films of Q-state CdS nanoparticles through electrostatic immobilization at the air–water interface, 300
Growth and characterisation of cadmium sulphide nanocrystals embedded in silicon dioxide films, 348
Carbon
Growth of 8H polytype of diamond using cyclic growth/etch oxyacetylene flame setup, 106
Mechanical stability of DLC films on metallic substrates. Part II—Interfacial toughness, debonding and blistering, 219
Carbon nanotubes
Stress calculations for carbon nanotubes, 11
Chalcogenides
Non-catalytic displacement plating (NCDP) of photosensitive semiconducting thin films, 139
Chemical vapor deposition
The reactant depletion effect on chemically vapor deposited SiC films with pressure and gas ambient, 195
Metal-organic chemical vapor deposition of aluminum from dimethylethylamine alane, 259
Chemical vapor deposition (CVD)
Effect of H_2 and N_2 in the remote plasma enhanced metal organic chemical vapor deposition of TiN from tetrakis-diethyl-amido-titanium, 24
Density and elastic constants of hot-filament-deposited polycrystalline diamond films: methane concentration dependence, 66
Carbon nitride films incorporated with metal by rf plasma enhanced chemical vapor deposition, 86
Chemical vapour deposition of BC_3N films and their laser-induced etching with SF_6, 99
Formation of polysilane film by laser CVD, 123
Chromium
On the formation of nonequilibrium A15 crystal structure chromium thin films by sputter deposition, 78
Coatings
An analysis of Ag/Al_2O_3 angular selective films by X-ray reflectivity, 4
Cobalt
Giant magnetoresistance in Ag/Co multilayers irradiated by excimer laser, 15
Cool-down
The effect of post-growth cooling rate on the defect structure in MBE-grown buried layers of $Si_{1-x}Ge_x$ on Si substrates, 362
Cooling rate
The effect of post-growth cooling rate on the defect structure in MBE-grown buried layers of $Si_{1-x}Ge_x$ on Si substrates, 362
Crystallization
Structure and crystallization of Sb–Se films prepared by vacuum evaporation method, 93
CTE
Study of ultra-thin hydrogen silsesquioxane films using X-ray reflectivity, 73

Elsevier Science S.A.

DC magnetron discharge
Plasma chemistry model of DC magnetron reactive sputtering in $Ar-O_2$ gas mixtures, 341
DC magnetron sputtering
X-ray photoelectron spectroscopy and spectral transmittance study of stoichiometry in sputtered vanadium oxide films, 116
Deposition process
An analysis of Ag/Al_2O_3 angular selective films by X-ray reflectivity, 4
Carbon nitride films incorporated with metal by rf plasma enhanced chemical vapor deposition, 86
Deposition temperature
Effect of sulfur doping on electrical conductivity of a-Si:H, 170
Diamond
Density and elastic constants of hot-filament-deposited polycrystalline diamond films: methane concentration dependence, 66
Growth of 8H polytype of diamond using cyclic growth/etch oxy-acetylene flame setup, 106
Mechanical stability of DLC films on metallic substrates. Part II—Interfacial toughness, debonding and blistering, 219
Dielectric constants
Spectroscopic ellipsometry studies of tetrahedral amorphous carbon prepared by filtered cathodic vacuum arc technique, 160
Diffusion
Effect of electron irradiation on the photovoltaic characteristics of GaAs $p-n$ junctions, 327
Dimethylethylamine alane
Metal-organic chemical vapor deposition of aluminum from dimethylethylamine alane, 259
DLC films
Mechanical stability of DLC films on metallic substrates: Part I—Film structure and residual stress levels, 207
Drying temperature
Control of preferred orientation in sol–gel lead-zirconate-titanate film on Pt/Ti/glass substrate, 130

Elastic properties
Density and elastic constants of hot-filament-deposited polycrystalline diamond films: methane concentration dependence, 66
Mechanical stress in micromachined components caused by humidity-induced in-plane expansion of thin polymer films, 232
Electrical conductivity
Effect of sulfur doping on electrical conductivity of a-Si:H, 170
Electroless
Non-catalytic displacement plating (NCDP) of photosensitive semiconducting thin films, 139
Electron microscopy
Structure and crystallization of Sb–Se films prepared by vacuum evaporation method, 93
Ellipsometry
Near infrared optical properties of laser ablated VO_2 thin films by ellipsometry, 61
InP monolayers inserted in a GaP matrix studied by spectroscopic ellipsometry, 354
Epitaxial
Low temperature growth of epitaxial $La_{0.5}Sr_{0.5}CoO_3$ films on (100)$SrTiO_3$ by pulsed laser deposition, 7
Epitaxy
Structural and electrical properties of Ni–Co films dc-biased plasma-sputter-deposited on MgO(001), 32
Preparation of epitaxial $PbTiO_3$ thin films by pulsed laser deposition, 40
EPMA
Preparation of Ta/Mo structure by using RF–DC coupled magnetron sputtering, 135
Etching
Chemical vapour deposition of BC_2N films and their laser-induced etching with SF_6, 99

Facing target sputtering source
TiN hard coating prepared by sputter ion plating system with facing target sputtering source and RF discharge, 182
Ferroelectric domain
Ferroelectric domains in epitaxial $PbTiO_3$ and $BaTiO_3$ thin films on MgO(100), 249
Ferroelectric properties
Ferroelectric properties of crystalline oriented $Pb(Zr,Ti)O_3$ thin films prepared by sol–gel technique, 228
Ferroelectric thin films
Preparation of epitaxial $PbTiO_3$ thin films by pulsed laser deposition, 40
Ferroelectric domains in epitaxial $PbTiO_3$ and $BaTiO_3$ thin films on MgO(100), 249
Fill factor
Electrical and photovoltaic characteristics of poly-emitter solar cells, 273
Finite element method
Simulation of Berkovich nanoindentation experiments on thin films using finite element method, 240
Fluorescence
Formation of polysilane film by laser CVD, 123
FOx®
Study of ultra-thin hydrogen silsesquioxane films using X-ray reflectivity, 73
Free-carrier absorption
Normal incidence n-type $GaAs/Al_xGa_{1-x}As$ quantum well infrared photodetector, 265
FTIR
Mechanical stability of DLC films on metallic substrates: Part I—Film structure and residual stress levels, 207

Gallium arsenide
Effect of electron irradiation on the photovoltaic characteristics of GaAs $p-n$ junctions, 327
Gallium phosphide
InP monolayers inserted in a GaP matrix studied by spectroscopic ellipsometry, 354
Graphitic tubules
Stress calculations for carbon nanotubes, 11

Hard coating
Composition, binding states, structure, and morphology of the corrosion layer of an oxidized $Ti_{0.46}Al_{0.54}N$ film, 190
Heterogeneous growth
In situ AFM observation of heterogeneous growth of adsorbed film on cleaved mica surface, 20
Hetero-interface
Effect of boron diffusion doping of silicon on the micromechanical and luminescent properties of porous layers, 202
Hot wall epitaxy
Growth and properties of aluminium antimonide films produced by hot wall epitaxy on single-crystal KCl, 111
Hydration of bilayers
Improvement of X-ray powder-diffraction patterns of *Salmonella minnesota* deep rough mutant bacterial lipopolysaccharide induced by heating plus hydration, 313
Hydrogen silsesquioxane
Study of ultra-thin hydrogen silsesquioxane films using X-ray reflectivity, 73

InAs deposition
Photoluminescence from InAs quantum dots on GaAs(100), 287
Indium
Thermal stability of crystalline thin films, 357

Indium tin oxide
Annealing effects on opto–electronic properties of sputtered and thermally evaporated indium–tin-oxide films, 268
Infrared spectroscopy
Growth and characterisation of cadmium sulphide nanocrystals embedded in silicon dioxide films, 348
Interfaces
Structural and electrical properties of Ni–Co films dc-biased plasma-sputter-deposited on MgO(001), 32
Intersubband transition
Normal incidence *n*-type $GaAs/Al_xGa_{1-x}As$ quantum well infrared photodetector, 265
Ion-beam analysis
Structure of plasma-deposited amorphous hydrogenated boron–carbon thin films, 147
Ion beam-assisted deposition
Control of the YSZ biaxial alignment on polycrystalline Ni–Cr substrates by ion beam selective resputtering, 27
Ion bombardment
Effect of Xe^+ bombardment on the formation of highly oriented rutile-type titanium oxide films, 1
Ion energy
Spectroscopic ellipsometry studies of tetrahedral amorphous carbon prepared by filtered cathodic vacuum arc technique, 160
Iron
Thermal stability of crystalline thin films, 357
Iron oxides
Characterization of r.f.-sputtered iron oxide films for modeling passive films, 46

KCl substrates
Growth and properties of aluminium antimonide films produced by hot wall epitaxy on single-crystal KCl, 111

Langmuir-Blodgett film
Studies on preparation of ultra-thin films of precursor polymer of poly(*p*-phenylenevinylene) via Langmuir-Blodgett technique, 291
Langmuir–Blodgett films
On the deposition of Langmuir–Blodgett films of Q-state CdS nanoparticles through electrostatic immobilization at the air–water interface, 300
Optical and electrical properties of bacteriorhodopsin Langmuir–Blodgett films, 306
Langmuir–Blodgett monolayers
Electric field induced molecular reorientation in stilbazolium salt Langmuir–Blodgett monolayers, 295
Laser ablation
Near infrared optical properties of laser ablated VO_2 thin films by ellipsometry, 61
Ferroelectric domains in epitaxial $PbTiO_3$ and $BaTiO_3$ thin films on MgO(100), 249
Laser beam
Pulsed laser deposition of solid-solution films using segmented targets, 156
Laser CVD
Formation of polysilane film by laser CVD, 123
Laser irradiation
Giant magnetoresistance in Ag/Co multilayers irradiated by excimer laser, 15
Density and elastic constants of hot-filament-deposited polycrystalline diamond films: methane concentration dependence, 66
Chemical vapour deposition of BC_2N films and their laser-induced etching with SF_6, 99
248 nm laser interaction studies on LaF_3/MgF_2 optical coatings by cross-sectional transmission electron microscopy, 176
Laser projection CVD
Formation of polysilane film by laser CVD, 123
Lead
Thermal stability of crystalline thin films, 357
Lead zirconate titanate (PZT)
Control of preferred orientation in sol–gel lead-zirconate-titanate film on Pt/Ti/glass substrate, 130
Liquid phase epitaxy
Effect of electron irradiation on the photovoltaic characteristics of GaAs *p–n* junctions, 327
Low dielectric
Study of ultra-thin hydrogen silsesquioxane films using X-ray reflectivity, 73
Low temperature
Low temperature growth of epitaxial $La_{0.5}Sr_{0.5}CoO_3$ films on $(100)SrTiO_3$ by pulsed laser deposition, 7

Magnetic properties
Reaction field approximation for ferromagnetic Ising thin films, 280
Magnetic structures
Giant magnetoresistance in Ag/Co multilayers irradiated by excimer laser, 15
Magnetron
Optical emission spectroscopy study of a radio-frequency magnetron discharge used for the fabrication of X-ray multilayer mirror, 320
Membrane structure and order
Improvement of X-ray powder-diffraction patterns of *Salmonella minnesota* deep rough mutant bacterial lipopolysaccharide induced by heating plus hydration, 313
Metallization
Metal-organic chemical vapor deposition of aluminum from dimethylethylamine alane, 259
Metal-organic chemical vapor deposition
Metal-organic chemical vapor deposition of aluminum from dimethylethylamine alane, 259
Metastable ceramic phases
Composition, binding states, structure, and morphology of the corrosion layer of an oxidized $Ti_{0.46}Al_{0.54}N$ film, 190
Mica surface
In situ AFM observation of heterogeneous growth of adsorbed film on cleaved mica surface, 20
Micro-hardness
Effect of boron diffusion doping of silicon on the micromechanical and luminescent properties of porous layers, 202
Micropatterning
Formation of polysilane film by laser CVD, 123
Monolayers
InP monolayers inserted in a GaP matrix studied by spectroscopic ellipsometry, 354
Multilayers
Giant magnetoresistance in Ag/Co multilayers irradiated by excimer laser, 15
248 nm laser interaction studies on LaF_3/MgF_2 optical coatings by cross-sectional transmission electron microscopy, 176
On the deposition of Langmuir–Blodgett films of Q-state CdS nanoparticles through electrostatic immobilization at the air–water interface, 300

(Ti,Al)N
Composition, binding states, structure, and morphology of the corrosion layer of an oxidized $Ti_{0.46}Al_{0.54}N$ film, 190
Nanostructures
Growth and characterisation of cadmium sulphide nanocrystals embedded in silicon dioxide films, 348
Nitrides
Carbon nitride films incorporated with metal by rf plasma enhanced chemical vapor deposition, 86

Optical and electrical properties
Sol–gel-derived *c*-axis oriented ZnO thin films, 37
Optical bandgap
Effect of sulfur doping on electrical conductivity of a-Si:H, 170
Optical coatings
248 nm laser interaction studies on LaF_3/MgF_2 optical coatings by cross-sectional transmission electron microscopy, 176
Optical emission
Optical emission spectroscopy study of a radio-frequency magnetron discharge used for the fabrication of X-ray multilayer mirror, 320
Optical properties
Formation of polysilane film by laser CVD, 123
Opto-electrical properties
Optical and electrical properties of bacteriorhodopsin Langmuir–Blodgett films, 306
Opto–electronic property
Annealing effects on opto–electronic properties of sputtered and thermally evaporated indium–tin-oxide films, 268
Organic electroluminescence
Studies on preparation of ultra-thin films of precursor polymer of poly(*p*-phenylenevinylene) via Langmuir-Blodgett technique, 291
Organometallic vapor deposition
InP monolayers inserted in a GaP matrix studied by spectroscopic ellipsometry, 354
Organometallic vapour deposition
Effect of H_2 and N_2 in the remote plasma enhanced metal organic chemical vapor deposition of TiN from tetrakis-diethyl-amido-titanium, 24
Metal-organic chemical vapor deposition of aluminum from dimethylethylamine alane, 259
Oxidation
Composition, binding states, structure, and morphology of the corrosion layer of an oxidized $Ti_{0.46}Al_{0.54}N$ film, 190

$PbTiO_3$
Preparation of epitaxial $PbTiO_3$ thin films by pulsed laser deposition, 40
PdCr
Improved passivating Cr_2O_3 scales for thin film high temperature PdCr strain gages, 331
Phase transitions
Reaction field approximation for ferromagnetic Ising thin films, 280
Photocarrier transfer
Photoluminescence from InAs quantum dots on GaAs(100), 287
Photo-luminescence
Effect of boron diffusion doping of silicon on the micromechanical and luminescent properties of porous layers, 202
Photo voltage
Effect of electron irradiation on the photovoltaic characteristics of GaAs *p–n* junctions, 327
Plasma chemistry
Plasma chemistry model of DC magnetron reactive sputtering in $Ar–O_2$ gas mixtures, 341
Plasma deposition
Structure of plasma-deposited amorphous hydrogenated boron–carbon thin films, 147
Plasma processing and deposition
Carbon nitride films incorporated with metal by rf plasma enhanced chemical vapor deposition, 86
Polycrystalline Ni–Cr substrates
Control of the YSZ biaxial alignment on polycrystalline Ni–Cr substrates by ion beam selective resputtering, 27
Poly-emitter solar cells
Electrical and photovoltaic characteristics of poly-emitter solar cells, 273
Polymers
Mechanical stress in micromachined components caused by humidity-induced in-plane expansion of thin polymer films, 232
Poly(*p*-phenylenevinylene)
Studies on preparation of ultra-thin films of precursor polymer of poly(*p*-phenylenevinylene) via Langmuir-Blodgett technique, 291
Polysilane
Formation of polysilane film by laser CVD, 123
Polysilicon
Electrical and photovoltaic characteristics of poly-emitter solar cells, 273
Porous silicon
Effect of boron diffusion doping of silicon on the micromechanical and luminescent properties of porous layers, 202
Electron transport in porous silicon, 254
Post-deposition annealing
Annealing effects on opto–electronic properties of sputtered and thermally evaporated indium–tin-oxide films, 268
Preferred orientation
Control of preferred orientation in sol–gel lead-zirconate-titanate film on Pt/Ti/glass substrate, 130
Ferroelectric properties of crystalline oriented $Pb(Zr,Ti)O_3$ thin films prepared by sol–gel technique, 228
Pulsed laser
Pulsed laser deposition of solid-solution films using segmented targets, 156
Pulsed laser deposition
Low temperature growth of epitaxial $La_{0.5}Sr_{0.5}CoO_3$ films on (100)$SrTiO_3$ by pulsed laser deposition, 7
Preparation of epitaxial $PbTiO_3$ thin films by pulsed laser deposition, 40

Quantum dots
Photoluminescence from InAs quantum dots on GaAs(100), 287
Quantum effects
On the deposition of Langmuir–Blodgett films of Q-state CdS nanoparticles through electrostatic immobilization at the air–water interface, 300
Quantum-size effects
Effect of boron diffusion doping of silicon on the micromechanical and luminescent properties of porous layers, 202
Quantum wells infrared photodetector
Normal incidence *n*-type $GaAs/Al_xGa_{1-x}As$ quantum well infrared photodetector, 265

Raman scattering
Growth of 8H polytype of diamond using cyclic growth/etch oxy-acetylene flame setup, 106
Growth and characterisation of cadmium sulphide nanocrystals embedded in silicon dioxide films, 348
Reactive sputtering
Plasma chemistry model of DC magnetron reactive sputtering in $Ar–O_2$ gas mixtures, 341
RF
TiN hard coating prepared by sputter ion plating system with facing target sputtering source and RF discharge, 182
RF–DC coupled magnetron
Preparation of Ta/Mo structure by using RF–DC coupled magnetron sputtering, 135
R.f. sputtering
Characterization of r.f.-sputtered iron oxide films for modeling passive films, 46
Rutile
Composition, binding states, structure, and morphology of the corrosion layer of an oxidized $Ti_{0.46}Al_{0.54}N$ film, 190

Salmonella minnesota R595 deep rough mutant lipopolysaccharide (Re-LPS)
Improvement of X-ray powder-diffraction patterns of *Salmonella minnesota* deep rough mutant bacterial lipopolysaccharide induced by heating plus hydration, 313
Second harmonic generation
Electric field induced molecular reorientation in stilbazolium salt Langmuir–Blodgett monolayers, 295
Selenides
Structure and crystallization of Sb–Se films prepared by vacuum evaporation method, 93
Self-aggregated membrane
Improvement of X-ray powder-diffraction patterns of *Salmonella minnesota* deep rough mutant bacterial lipopolysaccharide induced by heating plus hydration, 313
Semiconductors
Non-catalytic displacement plating (NCDP) of photosensitive semiconducting thin films, 139
Sensors
Improved passivating Cr_2O_3 scales for thin film high temperature PdCr strain gages, 331
Silane
Formation of polysilane film by laser CVD, 123
Silicon carbide
The reactant depletion effect on chemically vapor deposited SiC films with pressure and gas ambient, 195
Silicon compound
Effect of boron diffusion doping of silicon on the micromechanical and luminescent properties of porous layers, 202
Sol–gel
Sol–gel-derived c-axis oriented ZnO thin films, 37
Control of preferred orientation in sol–gel lead-zirconate-titanate film on Pt/Ti/glass substrate, 130
Solid-solution films
Pulsed laser deposition of solid-solution films using segmented targets, 156
Spectral transmittance
X-ray photoelectron spectroscopy and spectral transmittance study of stoichiometry in sputtered vanadium oxide films, 116
Spectroscopic ellipsometry
Spectroscopic ellipsometry studies of tetrahedral amorphous carbon prepared by filtered cathodic vacuum arc technique, 160
Sputtering
Effect of Xe^+ bombardment on the formation of highly oriented rutile-type titanium oxide films, 1
Structural and electrical properties of Ni–Co films dc-biased plasma-sputter-deposited on MgO(001), 32
On the formation of nonequilibrium A15 crystal structure chromium thin films by sputter deposition, 78
Ferroelectric domains in epitaxial $PbTiO_3$ and $BaTiO_3$ thin films on MgO(100), 249
Ferroelectric domains in epitaxial $PbTiO_3$ and $BaTiO_3$ thin films on MgO(100), 249
Optical emission spectroscopy study of a radio-frequency magnetron discharge used for the fabrication of X-ray multilayer mirror, 320
Improved passivating Cr_2O_3 scales for thin film high temperature PdCr strain gages, 331
Sputtering ion plating system
TiN hard coating prepared by sputter ion plating system with facing target sputtering source and RF discharge, 182
Stress
Mechanical stability of DLC films on metallic substrates. Part II—Interfacial toughness, debonding and blistering, 219
Structural properties
248 nm laser interaction studies on LaF_3/MgF_2 optical coatings by cross-sectional transmission electron microscopy, 176
Sulphur hexafluoride
Chemical vapour deposition of BC_2N films and their laser-induced etching with SF_6, 99
Surface morphology
The reactant depletion effect on chemically vapor deposited SiC films with pressure and gas ambient, 195
Surfaces
Reaction field approximation for ferromagnetic Ising thin films, 280

Temperatures
The effect of post-growth cooling rate on the defect structure in MBE-grown buried layers of $Si_{1-x}Ge_x$ on Si substrates, 362
TFT-LCD
Preparation of Ta/Mo structure by using RF–DC coupled magnetron sputtering, 135
Thermal stress
Ferroelectric properties of crystalline oriented $Pb(Zr,Ti)O_3$ thin films prepared by sol–gel technique, 228
Thin films
X-ray photoelectron spectroscopy and spectral transmittance study of stoichiometry in sputtered vanadium oxide films, 116
Non-catalytic displacement plating (NCDP) of photosensitive semiconducting thin films, 139
$Ti_{1-x}Al_xN$
Composition, binding states, structure, and morphology of the corrosion layer of an oxidized $Ti_{0.46}Al_{0.54}N$ film, 190
Time-resolved fluorescence
Electric field induced molecular reorientation in stilbazolium salt Langmuir–Blodgett monolayers, 295
Tin
Thermal stability of crystalline thin films, 357
TiN hard coating
TiN hard coating prepared by sputter ion plating system with facing target sputtering source and RF discharge, 182
TiN/HSS
Simulation of Berkovich nanoindentation experiments on thin films using finite element method, 240
Titanium nitride
Effect of H_2 and N_2 in the remote plasma enhanced metal organic chemical vapor deposition of TiN from tetrakis-diethyl-amido-titanium, 24
Titanium oxide
Effect of Xe^+ bombardment on the formation of highly oriented rutile-type titanium oxide films, 1
Transmission electron microscopy (TEM)
Structural and electrical properties of Ni–Co films dc-biased plasma-sputter-deposited on MgO(001), 32
Characterization of r.f.-sputtered iron oxide films for modeling passive films, 46
On the formation of nonequilibrium A15 crystal structure chromium thin films by sputter deposition, 78
Transport mechanism
Electron transport in porous silicon, 254

Vanadium oxides
Near infrared optical properties of laser ablated VO_2 thin films by ellipsometry, 61
X-ray photoelectron spectroscopy and spectral transmittance study of stoichiometry in sputtered vanadium oxide films, 116
VRH
Electron transport in porous silicon, 254

Water
Mechanical stress in micromachined components caused by humidity-induced in-plane expansion of thin polymer films, 232

XPS
X-ray photoelectron spectroscopy and spectral transmittance study of stoichiometry in sputtered vanadium oxide films, 116
X-ray
An analysis of Ag/Al_2O_3 angular selective films by X-ray reflectivity, 4
Optical emission spectroscopy study of a radio-frequency magnetron discharge used for the fabrication of X-ray multilayer mirror, 320
X-ray diffraction
Effect of Xe^+ bombardment on the formation of highly oriented rutile-type titanium oxide films, 1
On the formation of nonequilibrium A15 crystal structure chromium thin films by sputter deposition, 78
Growth of 8H polytype of diamond using cyclic growth/etch oxy-acetylene flame setup, 106
The reactant depletion effect on chemically vapor deposited SiC films with pressure and gas ambient, 195
X-ray powder-diffraction
Improvement of X-ray powder-diffraction patterns of *Salmonella minnesota* deep rough mutant bacterial lipopolysaccharide induced by heating plus hydration, 313
X-ray reflectivity
Study of ultra-thin hydrogen silsesquioxane films using X-ray reflectivity, 73

YSZ biaxial alignment
Control of the YSZ biaxial alignment on polycrystalline Ni–Cr substrates by ion beam selective resputtering, 27
Yttria-stabilized zirconia films
Control of the YSZ biaxial alignment on polycrystalline Ni–Cr substrates by ion beam selective resputtering, 27

ZnO thin film
Sol–gel-derived *c*-axis oriented ZnO thin films, 37
